Garmin 650 Quick Reference

Pairing a Device

1. Press Home
2. Tap “System”
3. Tap “Connex Setup”
4. Tap “Bluetooth Setup”
5. [Device-specific] On your device, go to your “Bluetooth settings page” and select the FlightStream device name to pair with
6. On the 650, tap “Yes” when prompted to accept the pairing
7. Accept the pairing on your tablet if applicable
8. *If pairing doesn't work:*
 - a) Turn your device off and back on
 - b) Unpair an existing device
 - c) Turn off Bluetooth on all other devices

Unpairing a Device

1. Press Home
2. Tap “System”
3. Tap “Connex Setup”
4. Tap “Bluetooth Setup”
5. Tap “Manage Paired Devices”
6. Scroll through the list to the device you want to unpair and tap “Remove”

Flight Plan Import

1. [Device-specific] From your device, initiate a flight plan transfer to the 650
2. The “MSG” status will flash on the 650 when it has received the flight plan
3. Tap “MSG” and then tap “New FPL” for the flight plan you want to import
4. If the previewed flight plan is correct, tap “Store” or “Active”
